Gilmar Miranda

Director UX Research & Design
São Paulo, São Paulo, Brazil

Summary

Throughout my career of over 12 years, I've led multidisciplinary teams in designing products and services that transform how people interact with digital ecosystems. We've done this by uniting human-centered design principles, mixed-methods research, and emerging technologies like Artificial Intelligence. This includes defining 0-to-1 product concepts and AI-driven experiences (at Google with Gemini and Workspace), building cultural localization strategies to adapt global features for the Brazilian market (at Meta with WhatsApp and Instagram), scaling super-app ecosystems and monetization models across Latin America (at Rappi with Rappi Ads and Rappibank), creating integrated urban logistics and micro-mobility networks (at Tembici with the iFood Pedal initiative), and mapping critical user journeys for banking and fintech leaders (at Nubank and Itaú).Today, I serve as Director of UX Research & Design at Ipsos, leading a team of designers, researchers, and specialists. I am on a mission to connect consumer behavioral intelligence directly to strategic product roadmaps and go-to-market plans, turning human behavior into scalable revenue and high-performing products for global brands.

Experience

Ipsos

Director UX Research & Design
February 2023 - Present (3 years 9 months)
São Paulo, Brazil

UX Research & Design Consultant:

- Meta (WhatsApp & Instagram) and Google (Gemini & Workspace):
Led cross-functional teams in direct partnership with US headquarters (HQ) product teams on 0-to-1 product conceptualization.
Conducted mixed-methods research (qual/quant) across regional and global scopes, steering strategic design and business decisions.

Structured cultural localization strategies and adapted Meta ecosystem products for the Brazilian market, ensuring contextual relevance and feature adoption.

- Nubank and Itaú:
Embedded within local product squads, applying advanced research and design methodologies to map critical user journeys.
Synthesized complex datasets into actionable insights, accelerating backlog prioritization and refining the customer experience.

Led a local team of 10 passionate designers, researchers and simultaneous translators to support the client projects.

Tera
Instrutor
March 2023 - January 2026 (2 years 11 months)
São Paulo, Brazil

Teacher User Experience

Rappi
Manager UX Researcher & Design LATAM
April 2021 - April 2023 (2 years 1 month)
Bogotá, Capital District, Colombia

Strategy and Scale:
Led the UX research strategy across Latin America for the super-app, managing the experience for both the consumer side (B2C) and the partner platform (B2B - restaurants and supermarkets). Rappi Ads.

Monetization and Retention:
Optimized B2B operations and the journeys of the ecosystem's financial products (Rappi Ads and Rappibank), directly driving platform revenue and partner success.

Business Intelligence:
Conducted in-depth competitive analyses against global players (iFood, Uber Eats) to support executive decision-making and identify agile innovation opportunities in the LATAM market.

Led a Latam team of researchers and design.

Tembici
Manager UX Researcher
May 2019 - April 2021 (2 years)
São Paulo, São Paulo, Brazil

Product Launch (iFood Pedal):
Co-led the strategy and field research for the creation of a holistic support ecosystem for couriers (e-bike rentals, rest zones). The project directly increased delivery volume and combined revenue for both Tembici and iFood.

Market Expansion:
Translated qualitative data and physical/digital journey mapping into operational improvements, supporting the expansion of LATAM's largest micromobility network to over 300 active stations across 8 major cities (Brazil, Chile, Argentina).

InstaCarro
Lead Product Designer
May 2018 - May 2019 (1 year 1 month)
São Paulo,Brazil

Worked within product tribes focusing specifically on conversion, user engagement, and lead generation to aggressively acquire more car sellers for the platform.
